Assignment 1

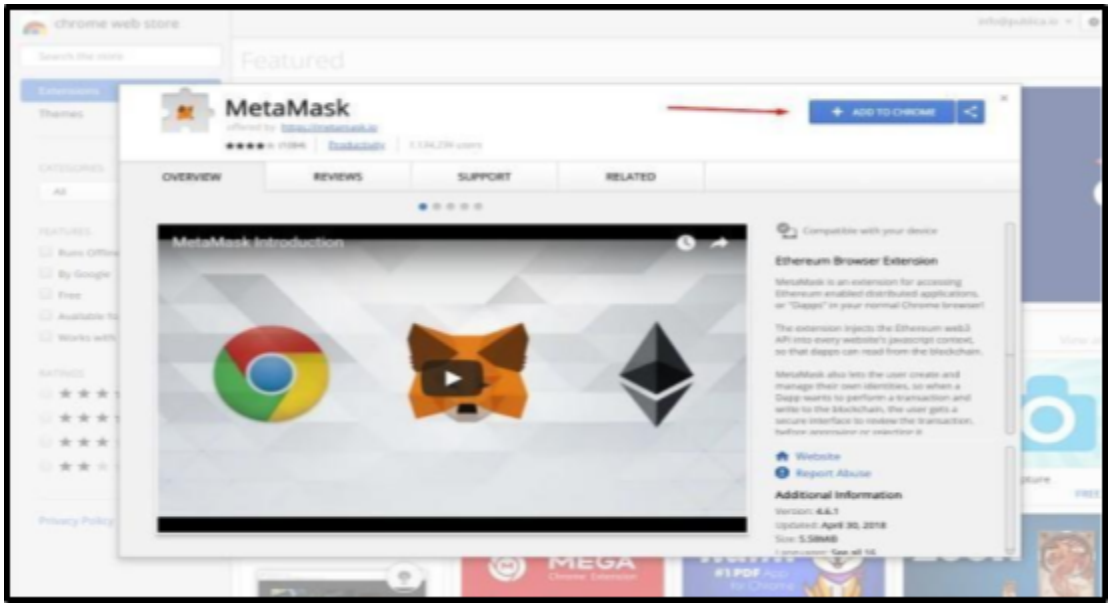

Step 1. Install MetaMask on your browser.

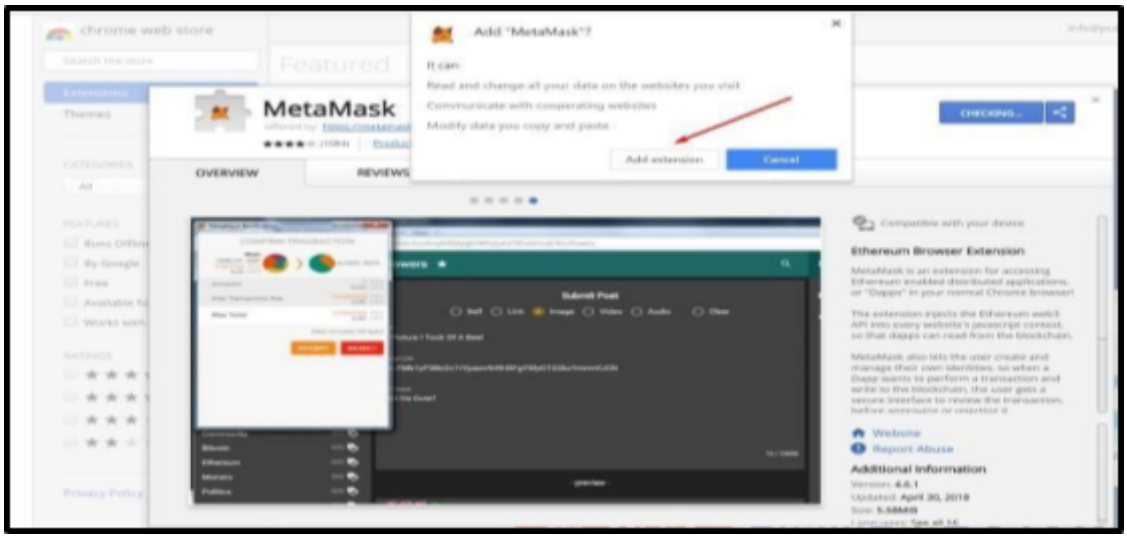

To create a new wallet, you have to install the extension first. Depending on your browser, there are different marketplaces to find it. Most browsers have MetaMask on their stores, so it's not that hard to see it, but either way, here they are Chrome, Firefox, and Opera.

- Click on **Install MetaMask** as a Google Chrome extension.
- Click **Add to Chrome**.
- Click **Add Extension**.

It’s as easy as that to install the extension on your browser, continue reading the next stepto figure out how to create an account.

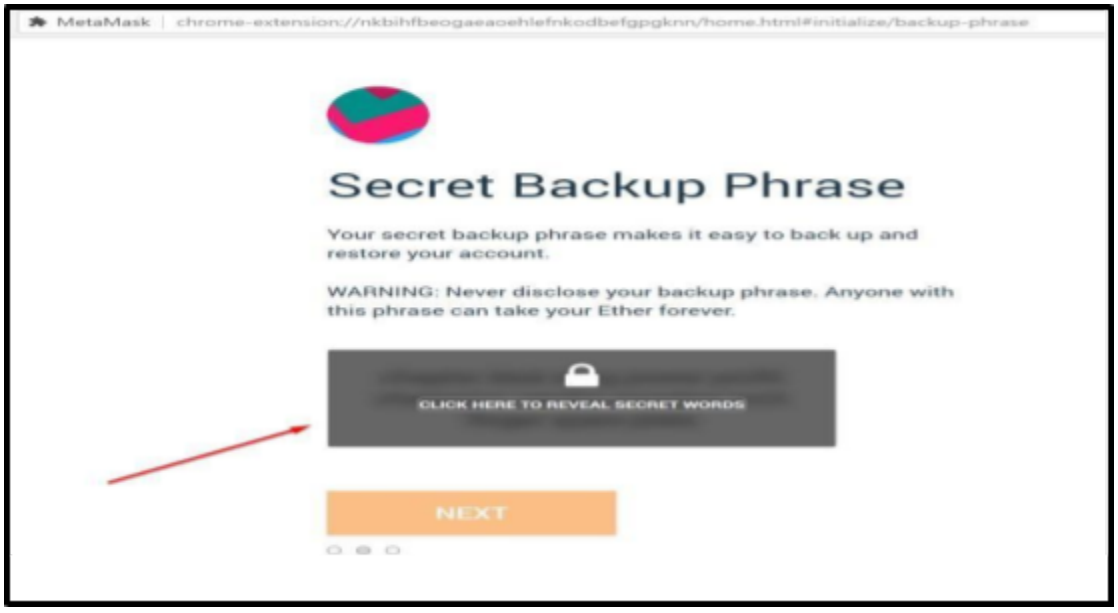

Step 2. Create an account.

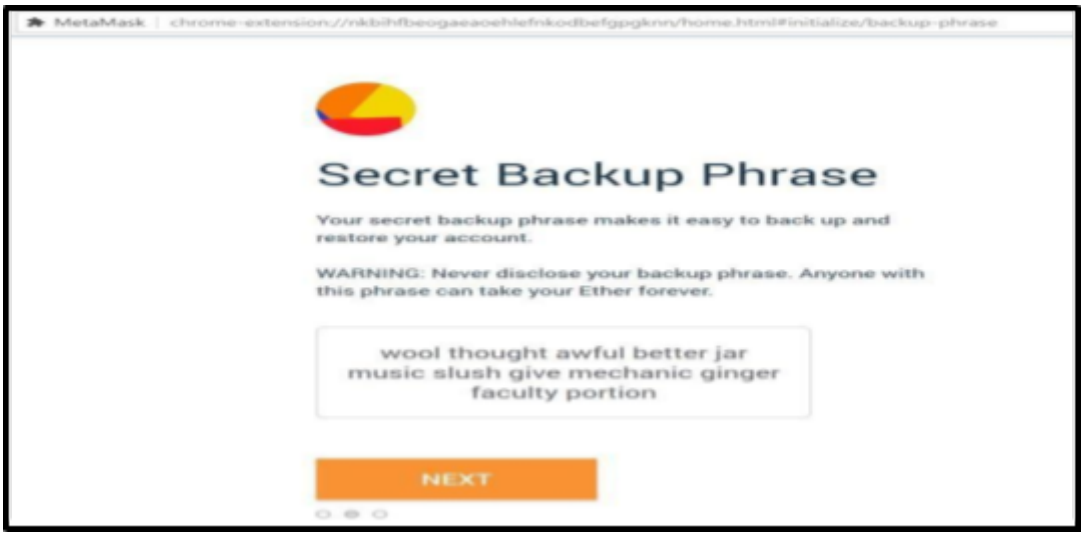

- Click on the extension icon in the upper right corner to open MetaMask.
- To install the latest version and be up to date, **click Try it now**.
- **Click Continue.**
- You will be prompted to create a new password. **Click Create**.

- Proceed by **clicking Next** and accept the Terms of Use.

Click Reveal Secret Words. There you will see a 12 words seed phrase. This is reallyimportant and usually not a good idea to store digitally, so take your time and write it down

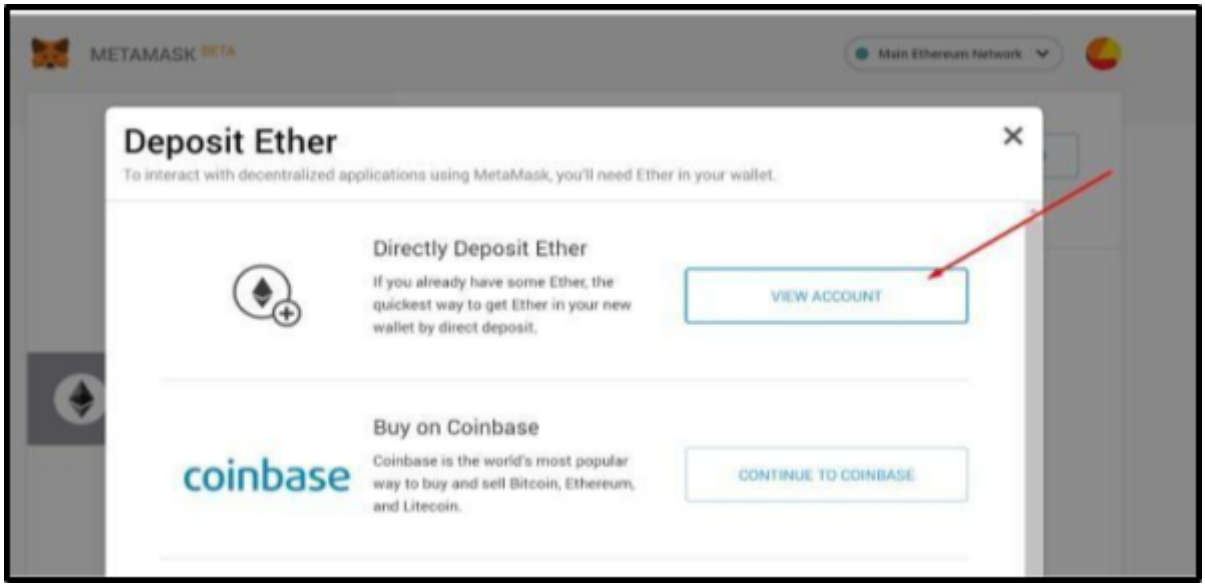

- Verify your secret phrase by selecting the previously generated phrase in order. **ClickConfirm**.

And that's it; now you have created your MetaMask account successfully. A new Ethereum wallet address has just been created for you. It's waiting for you to deposit funds, and if you want to learnhow to do that, look at the next step below.

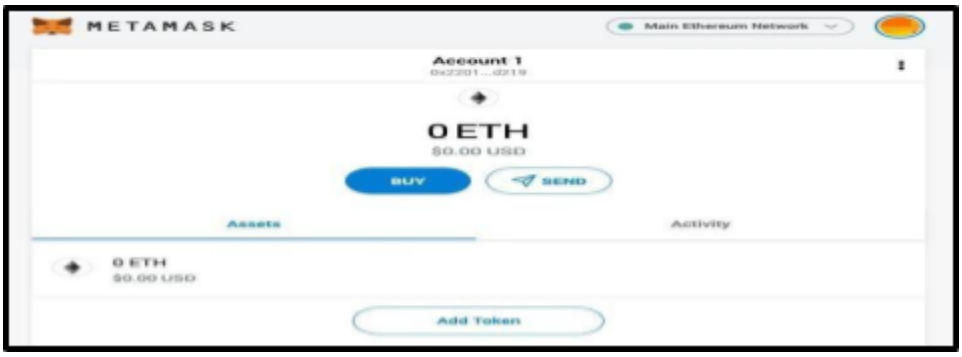

Step 3. Depositing funds.

- Click on **View Account**.

You can now see your public address and share it with other people. There are some methods to buy coins offered by MetaMask, but you can do it differently as well; you just need your address.

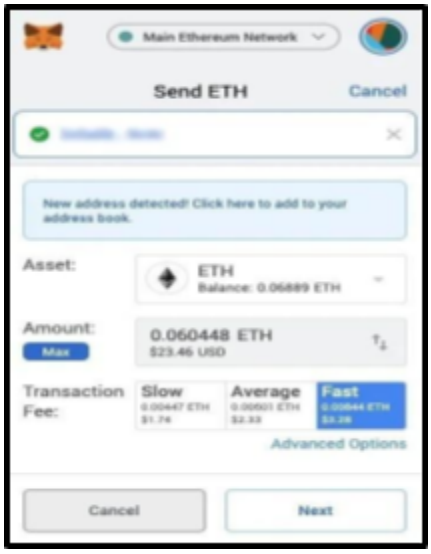

If you ever get logged out, you'll be able to log back in again by clicking the MetaMask icon, which will have been added to your web browser (usually found next to the URL bar).

You can now access your list of assets in the 'Assets' tab and view your transaction history in the'Activity' tab.

- Sending crypto is as simple as clicking the 'Send' button, entering the recipient address and amount to send, and selecting a transaction fee. You can also manually adjust the transaction fee using the 'Advanced Options' button, using information from ETH Gas Station or similar platforms to choose a more acceptable gas price.

- After clicking 'Next', you will then be able to either confirm or reject the transaction on the subsequent page.

- To use MetaMask to interact with a dapp or smart contract, you'll usually need to find a 'Connect to Wallet' button or similar element on the platform you are trying to use. Afterclicking this, you should then see a prompt asking whether you want to let the dapp

  connect to your wallet.

Conclusion:

Thus, we have explored Blockchain and MetaMask wallet for transaction of digital currency.
