Assignment - 4

Steps to installation of Selenium grid and selenium Web driver java eclipse

1. **Install Java** Download Java SE Development Kit 16.0.2 according to the Windows, Linux,Run the JDK Installer by double-clicking on the file name in the download location and following the instructions on the instruction wizard. Alternatively, silently install JDK by entering the following command: jdk.exe /s.

2. **Install Eclipse IDE**

3. **Install Selenium**

Download and Install Selenium to be set up in Eclipse.

4. **Install Browser Driver**

   For Cross Browser Testing, download the relevant Browser Driver – Chrome Driver (for Chrome), Gecko Driver (for Firefox), Safari Driver(for Safari), and Internet Explorer Driver and MS Edge Driver IE and Edge respectively

   Place these Browser Driver files in a directory that is part of the environment PATH. This will allow a command-line call to the programs to execute them irrespective of the working directory.

5. **Install Java Language Bindings**

   Version 3.141.59 (2018)

   Changelog

6. API Docs

7. The steps to configure Selenium Webdriver with Eclipse:

   Step 1: Launch Eclipse

   To launch Eclipse double click on the **eclipse.exe** file in the download location.

   Step 2: Create Workspace in Eclipse

   This workspace named "**C:\BrowserStack**" is like any other folder, which will store all the test scripts.

   Launch the BrowserStack workspace.

Step 3: Create New Java Project in the BrowserStack Workspace

Create a new Java Project by clicking on **File > New > Java Project** and name it.

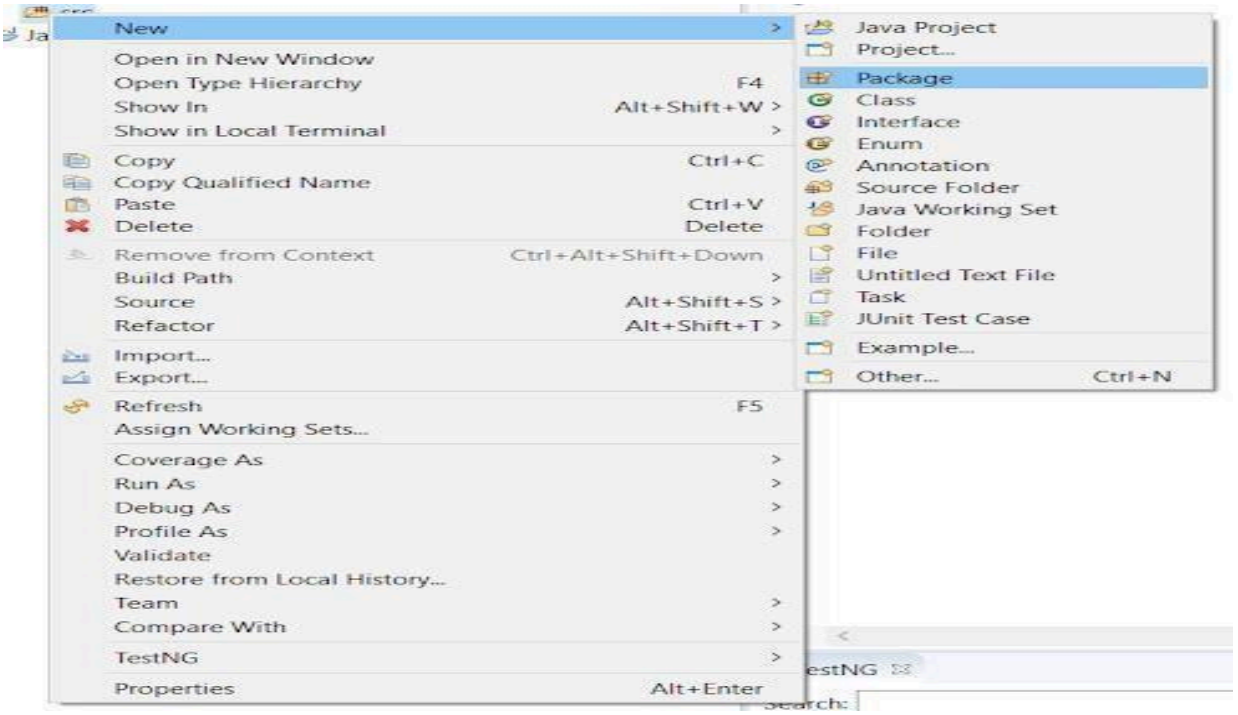

.

Step 4: Create Package and Class under the Java Project

By clicking on the **src folder** (which is the source folder), create a new package and name it

Then right-click on the package name and create a class.

Conclusion: Hence, we have successfully studied Installation of Selenium grid and selenium Web driver java eclipse.
