```
        }
    }

    cout << "Maximum Profit: " << dp[n][capacity];
    cout << "\nTime Complexity: O(n * W)";
    cout << "\nSpace Complexity: O(n * W)";

    return 0;
}
```

Output -

Output

```
Enter number of items: 3
Enter profit and weight of each item:
60 10
100 20
120 30
Enter knapsack capacity: 50
Maximum Profit: 220
Time Complexity: O(n * W)
Space Complexity: O(n * W)
```
